Graduate Teaching Fellows in K-12 Education

"Teaching the Science in Everyday Life"

Graduate students in the Engineering, Microelectronics Photonics, Chemistry, Biology, and Physics graduate programs at the University of Arkansas are eligible to apply for a one-year fellowship funded by the National Science Foundation and the UA. Fellows will take part in a program designed to instill the excitement of learning science into middle school classrooms. Teamed with 6th and 7th grade science and math teachers, fellows will develop lesson plans and teach inquiry-based experiments focused on the science in everyday life. Extensive training will be provided for Fellows as well as teachers during the summer.

Benefits of the Fellowship:

- **\$30,000 Stipend**
- Laptop computer
- Tuition and fees paid
- Excellent training in communications
- An opportunity to make a difference in science education

(Must be a US citizen or permanent resident to apply)
