

GK-12 Summer Training 04 Phase 3 (Developing Inquiry Lessons)

During Phase 3 of the GK-12 Summer Training, the fellows and teachers, guided by Dr. Gay Stewart, learned how to adapt inexpensive easy to obtain materials into inquiry lessons. This year three previous fellows presented what they called their "Best Lesson". The equipment for each lesson was given to every teacher, so they might adapt the lesson to their own curriculum. The fellows and teachers also used this time to develop one working lesson each to use during Phase 4, the KIDS Science Camp.
