

GK-12 Summer Training 04 Phase 4 (The KIDS Science Camp)

During Phase 4 of the GK-12 Summer Training (The KIDS Science Camp), the fellows and teachers, guided by Doctors Greg Salamo and Art Hobson, used science lessons developed during Phase 3 to excite pre-selected middle school students about the wonders of science and math. In addition to the middle school students being involved in interactive science activities, the fellows were exposed to a simulated middle school classroom environment. At the end of each day, Doctors Salamo and Hobson, along with the fellows and teachers, provided feedback with regards to the previous lessons.
